

GEETHIKA PATNANA

Aspiring Technical Trainer | Python Developer & Problem Solver

Hyderabad, India | +91 9393939849 | geethikapatnana612@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science (Data Science) graduate with strong Python fundamentals, built through 749 coding problems solved end-to-end on the NxtWave platform (basic to advanced logic). Backs this up with real project experience, a full NLP pipeline from raw PDF parsing to an explainable, production-style dashboard, so concepts are understood well enough to explain to others, not just used. Comfortable breaking down logic step by step and communicating clearly. Looking to bring this mix of strong fundamentals, problem-solving, and clear communication to a Technical Training Associate role.

RELEVANT STRENGTHS FOR THIS ROLE

- **Strong Python fundamentals:** 600+ coding problems solved on NxtWave (basic to hard), solid grip on core logic, not just syntax.
- **Explains technical work clearly:** built an interactive dashboard so model outputs and scoring logic are understandable, not a black box, a skill that carries directly into training.
- **Good communication & ownership:** comfortable taking a concept end-to-end, genuinely interested in teaching, and ready to learn continuously, travel, and commit to the program.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript
- **Problem Solving:** 600+ Python coding problems solved (NxtWave), basic to hard level, covering core programming logic
- **Web Development:** HTML, CSS, Bootstrap (responsive design)
- **Database:** SQL (queries, joins)
- **Applied in Projects:** spaCy (Named Entity Recognition), pdfplumber (PDF text extraction)
- **Tools:** Git, GitHub

PROJECTS

Smart-Hiring: Resume-to-Job Matching Pipeline

Python | Jan 2026

Live: smart-job-matching-system.streamlit.app

- Built an end-to-end pipeline that extracts structured candidate data from PDF resumes and ranks candidates against job descriptions using semantic similarity, reaching 88% matching accuracy against human recruiter judgments
- Used spaCy Named Entity Recognition to automatically pull names, organizations, and education details from resume text into structured JSON, achieving 95% accuracy on name extraction and 87% on skills extraction
- Designed a multi-criteria scoring logic (Skills 50%, Experience 20%, Education 15%, Location 10%) to rank candidates more consistently than simple keyword overlap
- Built an interactive results dashboard showing score breakdowns and skill-overlap per candidate, so rankings are easy to explain rather than a black-box output
- Tested the pipeline on a sample batch of 8 resumes against job descriptions to validate parsing and matching logic end-to-end

Personal Portfolio Website

HTML, CSS, Bootstrap

Live: geethika-patnana.github.io/geethika-patnana-portfolio

- Built and deployed a fully responsive personal portfolio site on GitHub Pages, with dedicated Skills, Projects, and Contact sections
- Implemented a mobile-first responsive layout using Bootstrap, verified across multiple screen sizes and devices

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

Aug 2022 – Apr 2026

St. Ann's College of Engineering & Technology, Vetapalem | 83%

Intermediate (MPC)

Jun 2020 – Apr 2022

Sri Vidya Junior College, Chirala | 95%

CERTIFICATIONS

- SQL Fundamentals — NxtWave
- Responsive Web Design (Static & Responsive Websites) — NxtWave
- Python Coding Problems Solved (Basic to Advanced) — NxtWave
